~OR~

THIS PLACE IS HELL

Grab your goodies; hit AB hold on lets go. This place is hell. The Buddhists have known and taught that for millennia and named it: Dukka. Sentient consciousness passes through this trial by fire as purification during spiritual evolution. The proverbial hell as it were is here; any flavor one wishes all the way from biblical fire, sulfur, and brimstone in flaming pits to over dependence or slavery to your kids. You name it the torture is here. Beings here prey on other beings and must eat flesh to survive in this eat it before it eats you in the physical realm. Whether plant or animal or insect flesh consumes flesh here on earth. Humans are both predator and parasite. Just look at how the parasitically prey on each other and all else here on earth.

Moreover, some of the greatest human minds are employed by military science in figuring out ways to more efficiently cripple, kill and create human suffering working for war departments like US DOD. Why are we not using them to better human life on this planet instead of making it more miserable? America spends trillions of trillions in resources making weapons of war while the American people or slaves it robs to do that suffer dearly especially the most vulnerable kids, elderly, and veterans. That is evil; and that makes America evil. And we have not gotten to what this country does to other countries with its endless wars in western military, imperialistic, expansion, and occupation that has been ongoing on for centuries.

Military scientists constantly design new ways to kill and maim people. For instance chemical and Bioweapons such as Dioxin aka Agent Orange, which is only one aspect of a dioxin based 'rainbow' herbicide family. Death from exposure to it is slow, painful, and crippling. Moreover the genetic effects are indescribably horrible. Visit Internet Archive.org to find picture essays of 5th generation Vietnam babies and children victims of this horrible weapon. The lucky ones that did not live at birth are pickled in laboratory jars. Don't miss out on VIEWING those living cripples. Pictures are elsewhere on the Web. After viewing are you still a proud American? America designed, manufactured, exported, and used that stuff on innocent people in Vietnam during that war. Can you look into the face of an innocent 5-year-old child and call it enemy then torture, cripple and kill it? You supported the government, industries and this country that did that to them. USA and manufacturers were so negligent and sloppy in training troops using Dioxin Herbicides in combat operations that it sprayed our allies and troops and those who were using it without any safety instruction or equipment in the line of duty. Enemy troops knew the spray schedules from spies within US ranks. They hid underground during spraying. Any exposures were collateral damage only. The stuff killed more of our people and South Vietnam freedom fighters and civilians than anyone else. US, WHOSE FUCKING SIDE WERE YOU ON? Then when they got sick US & VA denied them any help and is still doing that. Deny, delay, betray, and ignore until they die, and now we Vietnam veterans are nearly extinct.

**DO YOU WANT TO KNOW WHY? MONEY! FEAR OF LAWSUITS HOLDING OUR
FUCKED UP SOCIALIST GOVERNMENT AND THE CORPORATIONS THAT IT HIRED
TO CREATE THESE HORRORS ACCOUNTABLE FOR THEIR WAR CRIMES.**

How American.

**DIOXIN IS SIN THAT THE PARENTS UNKNOWINGLY
PASSED TO THEIR BABIES & CHILDREN.**

AMERICA YOU OWN THAT.

When knowledge of Dioxins destructive effects became widely known US did all it could to censor and cover it up. An exposed person is dead; a walking time bomb on two feet. US police state went so far as to cut up the contaminated aircraft such as C123's used during Operation Ranch Hand to spray Hell's Bioweapon death from the sky and sent them to metal smelters, which melted the pieces into liquid before forming it into billets and ingots hiding US war crimes crippling and murdering millions of living and unborn babies. Millions more adults suffer and die from this American curse. I am one of them.

HOW AMERICAN

Babies and children from harmed parental genome of exposed parents who unknowingly passing on those genes to their deformed babies.

Made in America.

**100 US Veterans a day successfully die by suicide from not receiving desperately
needed care from VA and America. Only America and VA can sink so low in**

cesspool filth profiteering from veteran suffering and suicide and babies such as the aforewritten.

Suicide is not cowardly. Cowardly is a country and its people that torture someone so badly that the person chooses to end life to stop his or her pain. That is cowardly. That is America and her people.

Troops in Mideastern wars face far worse toxic exposures than Vietnam Soldiers. Those walking dead are now on line and so are the civilian casualties aka babies and kids.

MAKE AMERICA GREAT AGAIN? COUNT ME OUT.

Moreover, US designed a bomb full of mini-bombs or bomblettes. These are very small to purposely look like a toy. After dropping the main bomb at a certain altitude the outer fragmented shell bursts apart scattering hundreds to thousands of bomblettes. They are small grenades. Some detonate on contact with the ground wounding and killing passersby and bystanders. When kids thinking one is toy pick up one of these it detonates partially or completely blowing off the child's hand.

Now for the really nasty part about this weapon. In it are nano AI fragments that resemble grass burrs. Anyone ever dealing with those bastards never forgets pain of a grass burr. Nano is a microscopic human made IA machine-organism. Readers, this is not Sci-Fi; it is real and very nasty reality! Clever, are not humans who designed and built these things? Millions of nano fragments are in that bomblette that saturate any body in proximity when the thing goes off. Human heartbeats attract them like a magnet draws iron filings to it. They also enter the bloodstream that transports them round the body. They stick and accumulate clogging up the circulatory system and block capillaries blocking blood flow to cells. Gangrene is one consequence when blood stops flowing to cells and they rot in body. These things also constantly move towards the heart collecting in it. Consequences to a victim is a painful, long death. *Clever US military sciences don't you think?*

People hit by these weapons like chemical weapons and Bioweapons are DOA terminal, living dead. No way to save anyone once these things infect a body. Vietnam War ended almost 50 years or nearly half a century ago and the country still remains HOT from undetonated ordinance scattered all over it. One has to check each step with bomb/mine detectors before taking it in uncleared areas. Hard to detect plastic mines they are a real bitch, I tell ya. Same for Middle Eastern battle grounds which is the whole country. Depleted Uranium armor coating on ammo, bombs and APC, tanks etc constantly emit plutonium radiation into anyone in or around the vehicles. FUBAR like Dioxin contamination. So many horrible weapons to kill and so little to help to heal people. US Military scientists engineering this stuff are some really sick fucks, I tell ya. This country supporting them and the government behind all this is sick & FUBAR as well.

These sinister weapons kill on contact in that the moment they touch a person s/he is dead. Either from initial contact or as the walking time bomb ticks off suffering and dying over days, weeks, months, years, or decades depending upon the person and dosage at time of contact.

An exposed person is literally an undead or walking dead human being.

Demons run amok on this planet. Humans are those demons and devils, and they live right here among us in hell. All of us are that and have the same potential to do these evils and beastly horrors to our kind; same as all the world's despotic examples left to us through the ages that now sit under our noses. I think that is why they exist as mirrors of each person's dark side. One can choose looking at them then decide whether to do that or not to do that without actually undergoing the criminal dirty work. This allows one the choice to tame his or her dark side without bloodshed for which when making that choice s/he dearly pays in consequences while existing in a cause and effect paradigm. Darkness is not controlled. It is tamed. Like a tamed draft animal that one can use as a disciplined beast for good or evil, which only is a decision and choice, a free will choice freely available to all that pass that pass this way. Fence sitters doing nothing is a choice with consequences.

This follows a passage from christian biblical texts that if you commit a sin of the heart one is guilty of actually doing it. In a sick way that is true; however until doing it in the real world it is a victimless crime. Where this cult gets off is in suppressing dark side thoughts instead of taming them to proactive uses. Mental suppression drives a person insane, which eventually leads s/he to do the crime in resolving an unresolved mental mismatch or cognitive dissonance from suppression. In the movie 2001 a space Odyssey that happened when AI, Hal the space ships computer went berserk encountering a human lie or deception. That cognitive dissonance over rode Hal's failsafe against harming humans. Hal's designer never programmed the human inconsistency of lying into it.

Parents program it into their kids by punishing s/he for telling the truth. So a child learns to avoid pain by lying. Kids soon learn that the trick of deception without pain is in not being caught in a lie. Parents are dumb and a smart kid knows that to get around them and their constipated rules. However in a twist of that our child AI Hal dealt with its dissonant insanity by punishing humans lying to it by murdering the crew. While ship's crew is tearing the ship apart trying to figure out what is wrong with Hal, AI is tearing them apart trying to figure out what is wrong with the human gods that drove it crazy via deception. Human minds work the same way. **Paranoia Will Destroy Ya** as the Kinks said in one of their songs titled **Paranoia Will Destroy Ya**. In Hal's case AI destroyed lying humans, too. The human inconsistency of deceit does not compute whether to AI or a child it makes no sense. I do not think big people understand it either. They simply learned deceit from their parents and so on. Little monkey sees little monkey copies. When 13th monkey effect chimes in soon a whole nation is lying not just our chiseling politicians.

Dept of Veterans Affairs is impotent to help any but self. Suicidal veterans driven suicidally insane from painful exposures meet with minimization, denial, abuse, and encouragement to go ahead, kill yourself to rid us of your troublesome ass. 'Sticks and stones can break my bones but words will never hurt me' might be a cutesy nursery school rhyme but in the real world words do cripple and kill. Visit the grave markers of troubled veterans seeking VA help told to get out, go ahead and kill yourself screamed by a VA ER doctor at a veteran visiting it seeking help. Then VA Dr. ordered security to

throw him out of the hospital. Days later his family found the dead man hanging from an electrical cord in his garage. That list is endless. VA employees mistreat a troubled veteran seeking their help as harassing them! A sick person seeking medical help in a VA clinic or hospital is harassing VA employees?! There are the sickest fucks of all in US socialist government healthcare, the Nazi bureaucrats! For any of you doubters Google vet suicide and VA scandal for gorier, ugly details not even the worst communist country can best! Over 300,000 veterans hidden away on secret waiting lists died during the last 4 years of Mr. Obama's term in office. I nearly died on one of those lists and underwent an induced suicide session, MHC therapy; terror sessions conducted by VA Ms. PhD and lived to write about it. VA created and is responsible for the veteran suicide crisis in USA murdering 100 US vets daily.

100 veterans successfully suicide daily because of VA Nazis; Only America and VA can sink so low in sewer filth profiteering from veteran suffering and suicide in addition to what this country does to children and babies in other countries. Can you look a baby in the face call it enemy then murder it in cold blood? American's do that ever day in supporting your government doing just that. Bloodshed stains your hands.

The only good defense of VA that I can give it is what does one do with dying, crippled, and suffering living dead people? Ask self what else aside from killing them to end their pain can you do? Keep the person or persons comfortable until natural death ends their life of suffering. The VA opioid epidemic attempted to do just that. VA politically took it on the chin in doing that. Evidently their actions cut into black market drug sales so drug lords squeezed the balls of their bitches in DC's Whorehouse, which put VA's narcotic Candyland relieving Veteran pain out of business. When vets cut off from that lifeline went through cold turkey withdrawal in addition to the painful diseases handed to them by the same DC Whorehouse and the coward American people that supported their wars. VA fucked up in not getting methadone to the Vets until almost a year later. Methadone eases narcotic withdrawal symptoms, which is known cold turkey withdrawal in getting an insane monkey off their backs.

Ever see anyone go through Cold Turkey narcotic withdrawal? It is terrifying holding a hand of someone in that much terror and pain screaming & begging to die but cannot, I tell ya. That is Socialist medical care America.

Medical care is all about addiction. America is the most addicted country on this planet and the whole world is in on the action. Doctors Mr. & Mrs. MD get patients addicted to drugs as medical care slaves feeding their pockets. Whether as a junkie to narcotics, diabetes meds and similar that once an artificial means supplementing body produced hormones and such is started these destroy the body's natural systems doing those functions. Once started the addict cannot ever go back. When artificial insulin is injected into a body its endocrine system shuts down natural insulin production systems as unneeded. Same for Thyroid and similar dysfunctions. Once addicted, a person then is enslaved to Medical Inc., Pharma Inc., drug stores Inc. for life to get a fix. No one is immune from

this predatory parasitism. Prof. Jordan Peterson a renowned Canadian Psychologist for instance. His doctor addicted him to a very addictive drug in the diazepam family prescribed for anxiety. Like *Mother's Little Helper* in a Rolling Stones song except Doctor's little helper in this case. That Stones song was a warning about hazards of legal medical industry's sloppy to criminal drug use and abuse. The VA was already well into doing that; civilian medicine was slightly slow in catching up to VA criminals. When he tried to get off the stuff - Voof! Bad idea. Withdrawal for him was a terror like narcotic cold turkey. Prof Peterson jet setted round the world to medical clinics that **promised** the cure for his addiction without finding one. Seems Medical industry can break and addict people but not fix them of it. The addict is enslaved to a addictive drug and people that source it.

The only difference between your doctor and a street corner pusher is the guy on the corner is honest about what he is doing and selling. Dr. Marcus Welby or Dr. Kildare would not lie to you would he? Yes and do so every day enslaving you far more than the corner dope pusher in doing so.

Those pimps during prime time TV sold you into medical whoredome between adverts for soap powder and Big Pharma pitches of 'be your level best' taking our brand of impotent dope over leading competitor brands. They spent billions paying Madison Ave to peddle their shit while the street corner pusher runs his operation bare bones selling direct by whispering, 'Hey! Dude, wanna buy some blow?' That is selling it in America; that is addiction Born in the USA. And the world is getting a piece of that action out of America's ass every moment – smooch and anal lube at extra cost to US slaves lazing fat, numb and stupid under bread, wine and circus tents built to shelter a nation of addicted slaves. The perfect slave is one who says, 'I am not a slave.' America is one such addiction driven, dysfunctional, enslaved nation.

DIOXIN IS **SIN** THAT THE PARENTS
UNKNOWNLY PASSED TO THEIR BABIES &
CHILDREN.

AMERICA YOU OWN THAT.

When knowledge of the destructive effects of Dioxin became widely known US did all it could to censor and cover it up. US police state went so far that it cut up the contaminated aircraft used to spray Hell's Bioweapon from the sky and sent them to metal smelters, which melted the pieces into liquid before forming it into billets and ingots hiding their war crimes.

HOW AMERICAN

Why is it that babies and kids take it on the chin to suffer worst of all? America still denies Vietnam families damages for aforewritten effects of its actions harming kids same as it denies harming American people forcefully employed with a gun in the back held by America to handle and suffer harm from dangerous chemical weapons as Dioxin. Whether directly or by proxy, America, all bloodshed against harmed children and veterans belongs to you. Their Bloodstains your hands worst of all. There is a price to pay for that. Collectively and individually we all pay a price to pass through and get out of hell. Without exception.
